

AT Food Co.

Fresh Pet Nutrition & Continuous Care Ecosystem

Made with **GAMMA**

The Pet Parent Dilemma

Information Overload & Feeding Anxiety

Conflicting Advice

Kibble vs. raw vs. home-cooked — no consensus, endless guilt

Digestive Uncertainty

67% of pet parents report recurring GI issues with commercial food

Portion Quesswork

"Am I feeding too much? Too little?" — no personalized guidance

Food Fatigue

Dogs lose interest; parents cycle through expensive brands

Fragmented Records

Vet notes, allergy lists, meal history scattered across apps and notebooks

CORE INSIGHT

Customers Don't Buy Food.

They Buy Confidence.

The Anxiety Tax

Willingness to pay a **3–4x premium** for certainty over commercial kibble — validated through customer interviews

Trust Is the Moat

Once a parent trusts a feeding system, switching costs become prohibitively high

Data as Reassurance

Transparent tracking of health outcomes builds loyalty and reduces churn

Target Users & Personas

Both segments share one need: **eliminate guesswork and operational friction.**

The Conscious Caregiver (*D2C*)

Ages 28–45, urban, \$75K+ income. Views dog as family member — willing to invest in health, but overwhelmed by choices and conflicting information.

The Operational Manager (*B2B*)

Boarding facilities & veterinary clinics struggling with food prep, storage, liability, and consistency across multiple dogs simultaneously.

The Solution

TWO PRODUCTS, ONE SERVICE

Fresh Meal Platform

Freshly cooked, portion-controlled, balanced meals delivered on subscription — Daily, Weekly, or Monthly.

Hyper-local cluster kitchens ensure freshness and delivery economics that centralized models can't match.

Dog Life Record

Digital platform tracking health, allergies, vaccinations, meal history, and dietary response.

Every meal logged. Every record informs the next meal. The data flywheel begins here.

 The Flywheel: Data personalization → improved outcomes
→ higher retention → lower CAC

The Core Flywheel

How Data Personalization Drives Lifetime Retention

Business Model & Unit Economics

D2C Subscriptions

Pre-paid recurring plans. Average order value **\$180–\$280/month** per dog. Gross margin **55–65%** after COGS and delivery.

B2B Partnerships

Supply contracts with boarding facilities and vet clinics. Margin **40–50%** — lower, but predictable revenue and brand credibility.

Data Monetization (*Future*)

Anonymized insights sold to pet health researchers and supplement brands — non-core, long-term revenue stream.

Revenue Stream

Hyper-local cluster kitchens improve margins by **12–15%** vs. centralized model — validated through VC stress-testing.

Competitive Landscape

Commercial Ribble

Cheap and convenient — but one-size-fits-all. High churn due to GI issues and food fatigue. **Zero personalization.**

Home Cooking

Personalized, but time-intensive, inconsistent nutrition, and anxiety-inducing. Parents lack confidence in nutritional balance.

Fresh Meal Startups

Offer convenience but **lack integrated health tracking.** No data flywheel. High churn, high CAC — no defensible moat.

AT Food Co. ✓

Fresh meals + Dog Life Record + hyper-local delivery + B2B = **defensible moat** through data, trust, and operational efficiency.

Execution Roadmap

Phased Growth: Build Trust → Partnerships → Clinical → Experiences

Phase 1 · Months 1–6

Launch micro-kitchen in pilot city. Recruit **100–150 dogs**.
Validate unit economics and Dog Life Record engagement.

1

2

Phase 2 · Months 7–12

Expand to **2–3 additional cities**. Secure first B2B partnerships with boarding facilities and vet clinics.

3

Phase 3 · Year 2

Clinical validation studies with veterinary partners. Position as **recovery care solution** for post-surgery and chronic conditions.

4

Phase 4 · Year 2+

Expand experiences — training partnerships, wellness events — leveraging Dog Life Record data and community.

Next Steps & Vision

1 Immediate — Next 90 Days

Launch Phase 1 micro-kitchen. Recruit pilot cohort of **100–150** health-conscious dog parents.

2 Validation Goals

Achieve **85%+ retention** at 6 months. Demonstrate **3–4x** willingness-to-pay premium. Secure first B2B letter of intent.

3 The Vision

Become the trusted **operating system for dog health** — where every meal, every record, and every insight builds a lifetime of confidence and care.
